Audio Pop

User will begin on a Page layout similar to this. User must Identify intended form of use.

Bluetooth

Headphones

This page will provide User with instructions On how to connect a Phone up to the head Unit or sound source wirelessly. Possibly a button to get to Bluetooth settings

Bluetooth Settings

Next

This page will possibly link to the Phones bluetooth Settings.

Next

Here will be info on Connecting through 3.5mm port on your Phone or device.

Next

At this point the test Can begin. Assuming All channels are Connected properly And none of the Speakers are blown. User can press the Button for which Speaker is needed And listen with the Mic on the phone
